RECENT PROJECTS

GoldieMohr | [Github](#) | [Website](#)

A single page application for GoldieMohr Ltd., a construction company based in Ottawa. The company had an outdated website built by WordPress with several bugs and issues. The aim was to build a modern, easy to use, accessible and mobile responsive website using React.

- Redesigned the layout and structure of website
- Created responsive UI components and pages such as; footer, contact us, products and careers
- Performed functional testing to ensure website is accessible and compatible with various browsers

Technologies used: HTML5, CSS, JavaScript, Bootstrap, React, SQL, EmailJS, and Node.js

The Shoppies (Movie Search) | [Github](#) | [Website](#)

A single page application that allows a user to search for movies and display information using OMBD's API. Search results are displayed dynamically where users are able to nominate up to 5 movies that will be stored on browsers until they are removed from the nominated list.

- Designed and implemented simple, polished, and mobile responsive web application using React
- Used Axios for making API calls to show movie search results promptly, and LocalStorage to store nominated movies.

Technologies used: HTML5, CSS, JavaScript, Bootstrap, React, Axios, and LocalStorage

Library Management System | [Github](#) | [Website](#)

A personal web-based application to build a library management system. The aim was to build a platform that helps in handling the primary functions of libraries which involves maintaining the database.

FAISAL NOUR

- Designed and developed web application to store and retrieve data using RESTful API
- Designed and created a database using SQL Server to store, edit, and delete users, books, borrow and return books

Technologies used: HTML5, CSS, JavaScript, Bootstrap, SQL Server, RESTful API

PROFESSIONAL EXPERIENCE

Digital Associate | Accenture | Toronto, Canada 2019 – 2020

- Worked with agile team to analyze the current state of e-commerce integration to migrate to AEM 6.5
- Performed functional audit for six e-commerce websites to decide what features/components can be reused
- Helped Senior Managers in forms of preparing reports and presentation files
- Led research project about new technologies that could help solving complex problems

Front-end Developer | Sadda Advanced Technology | Riyadh, Saudi Arabia 2014 – 2016

- Translated UX wireframes into responsive, interactive features using HTML, CSS and JavaScript
- Developed and maintained websites and e-commerce sites
- Fixed bugs to optimize user experience and ensure website function and stability across devices i.e. mobile devices and tablet
- Worked with back-end developers in designing & maintaining databases using SQL Server
- Executed test cases and documented application defects in a bug tracking system JIRA

Graphic Designer | Sadda Advanced Technology | Riyadh, Saudi Arabia 2012 – 2013

- Created website designs for corporations, non-profit organizations, e-commerce, and personal
- Designed and produced multiple forms of marketing materials like banners, posters, and billboards
- Created products that are user-friendly, effective and appealing using Adobe Photoshop, InDesign, Illustrator and InVision
